

Summer Term
2019

Year 6 Learning Journey

P.E.:

Our outdoor PE lesson this term will be athletics where children will be developing their running, jumping and throwing skills. They will then be applying these skills to a variety of athletics events, including hurdles, long jump and shot-put.

Our indoor lessons this term will be focussing on improving our overall health and fitness, as we take part in weekly circuits! We will be learning about the most effective ways to exercise different muscles and different ways we can measure our fitness levels.

Maths:

This term we will be focussing on geometry, statistics and problem solving.

During our work geometry work, we will be learning how to measure accurately with a protractor. We will then be learning how to calculate missing angles in both lines and shapes. Finally, we will be applying all of this knowledge to accurately draw shapes and their nets. We will also be accurately constructing 3D shapes.

As we move onto statistics, we will be focussing on line graphs and pie charts. We will learn how to read and interpret both types of charts and create our own charts using data we have collected ourselves. Finally, we will be learning how to calculate the mean and when this might be useful.

During our final weeks of Year Six, we will be applying everything we have learnt this year to a variety of different problems, including reasoning and real-life problems.

Spelling, Punctuation and Grammar:

In our daily spelling lessons, we will be focussing on common suffixes, including -ible and -able. We will then be looking at common mistakes, including plural nouns, homophones and apostrophes.

During our punctuation and grammar lessons, we will be recapping our learning so far in KS2, including: using and punctuating direct speech with inverted commas; the names of different tenses and when they need to be used and how to accurately punctuate different types of sentences.

Music

This term, we will be learning fanfare, rap, song and famous music to perform in a grand ceremony. As our time in primary school draws to an end, we will also be learning two different songs, one looking back and one looking forward. We will use a musical device to link both songs together.

PSHE:

This year we are continuing to learn about how we can be good friends to each other and manage our own emotions through our weekly sunshine circles. We will also learn about how to respect and tolerate those who hold different beliefs to us.

RE:

In RE we are learning about stories of faith and what we can learn from stories shared by Christians, Jews and Muslims.
