

# Big Question:

## How has the physical and human geography of Hunstanton Beach changed over time?

### Key Vocabulary:

**Human Features:** Geographical features created by people.

**Physical Features:** Geographical features created by nature.

**Erosion:** A physical process that involves movement of natural materials like sand, rock and soil.

**Weathering:** The process of natural materials wearing away.

**Locate:** to find something.

**Eco-friendly:** looking after the environment

### Knowledge from Y1 that will help me answer the big question:

- A material is something used to build or make something else.
- Natural materials are dug out of the ground, grown or taken from a living thing.
- Man-made materials are often made from natural materials but have been changed to have different properties.
- Physical features are naturally-created features of the Earth.
- Weather is a physical process.
- Litter and pollution have a harmful effect on the areas where we live, work and play.

### New knowledge that will help me answer the big question:

An environment or place can change over time due to a geographical process, such as erosion, or human activity, such as housebuilding.

### New knowledge that will help me answer the big question:

The local environment can be improved by picking up litter, planting flowers and improving amenities.

Erosion wears away materials like rock and sand. This is why cliffs and beaches change over time.

Materials found in the environment can be natural (rock, stone, water, sand, soil, water and clay) and man-made (brick, glass, plastic and concrete).

### New knowledge that will help me answer the big question:

Human features are man-made and include castles, towers, schools, hospitals, bridges, shops, tunnels, monuments, airports and roads.

People use human features in different ways. For example, an airport can be used for work or leisure and a harbour can be used for industry or travel.

As a geographer, the essential knowledge I need to answer the big question is:	Date	
Materials found in the environment can be natural or man-made.	14/6/23	
A physical feature is one that forms naturally and can change over time.	21/6/23	5/7/23
A human feature is one that is man-made.	10/7/23	
Erosion is a physical process that involves weathering of natural materials.	28/7/23	
Erosion can be caused by wind and water movement.	28/7/23	
We can make a difference to our planet by looking after our environment.	19/7/23
